

Product: Radiator Extension Pieces

Product Overview:

A radiator extension piece is used when changing radiators or radiator valves.

It allows for adjustments in situations where a standard radiator valve or TRV does not align precisely with the existing pipework or radiator.

Our extension pieces are available in many varieties stated below; whether you require a rigid or telescopic extension piece, we have the size suitable for the job in hand.

Features and Benefits:

Telescopic version requires no cutting

Rigid version enables you to cut to required length

Product Range:

Product Code	Tail Type	Tail Length	Thread Size	Drain off
RVEX1230T	Telescopic	15-35mm	½"	No
RVEX1260	Rigid	60mm	½"	No
