

Product: Tesla Thermal Control Plate
Code: TCP200

OVERVIEW

The Tesla Thermal Control plate is used to regulate the output of electric towel rail elements. With an IPX5 rating, you can wire an element directly into this unit (in the bathroom) giving you control over your towel rail heating.

FEATURES & BENEFITS

- IPX5 Rated
- Can be used on dual fuel applications as well as electric only
- LED Indicators
- 20% Temperature Increments
- 2 Hour Boost Function
- On/off Button

Boost (Control off)

Pressing the boost function with the unit off will switch it to its previous setting for 2 hours and then switch itself off.

Boost (Control on)

Pressing the boost function with the unit on will switch it to full power for 2 hours before reverting to the previous output setting.

SPECIFICATION

IP Rating	IPX5
Approvals	CE
