

Product Code: Straight Tundish
Code: STUN1522

Product Overview:

A tundish is an essential component of the overflow/discharge pipework installed on an unvented hot water system to provide protection against excessive pressure and/or temperature.

It provides an air gap with a window to provide clear visibility of any water discharge that will indicate that there is an issue with the system.

Features & Benefits:

Large viewing window
G3 water regulations compliant
Integrated anti-spray nozzle

Suitable for:

Unvented hot water systems

Inlet connection	15mm compression
Outlet connection	22mm compression
Pack quantity	12
Box quantity	48
Height	83mm
Diameter	40mm

Tesla UK also provide a dry trap tundish. Please visit our website or get in touch for more information on our codes "DTUN1522 & DTUN1532"
