

Product: Wiring Centre
Codes: EWC12

Product Overview:

A wiring centre is used as the main hub where various items of electrical and communication equipment are connected and terminated.

In a typical setup, these wiring centres include, boilers, zone valves, pumps, thermostats and many more items which need to work together to gain proper and efficient control of certain aspects in the home, whether that be the central heating and/or hot water systems.

Features & Benefits:

- 12 connections
- 12 break-off cable insert tabs
- Built-in mains in cable clamp
- Removable junction block
- CE and UKCA marked

Suitable for:

- Boilers
- Pumps
- Thermostats
- Zone valves
- Any electrical item requiring connection to other sources

Specification:

- Length – 147mm
- Height – 87mm
- Depth – 39mm
