

**Product:** Lever Ball Valve With Strainer  
**Code:** BVL28FIL

## Product Overview:

The lever operated ball valve, featuring an integrated strainer, offers robust safeguarding for systems susceptible to debris accumulation. The detachable strainer ensures convenient and efficient maintenance, enabling the simultaneous closure of both sides with a single lever. By removing the securing circlip, the mesh strainer can be taken out for routine cleaning, providing ease of service and ensuring system integrity.

## Features & Benefits:

- Compression fittings
- Lever operation
- Easy access strainer
- Time saving
- Adjustable stem with O-rings and PTFE ring

## Suitable for:

- Boilers
- Central heating
- Heat pumps
- Most systems susceptible to system debris

## Specification:

Feature	Value
Min working temp	0°C
Max working temp	95°C
Max working pressure	10bar
Connection type	Compression
Body material	Brass alloy HPb57-3
Filter mesh material	304 austenitic stainless steel
O-Ring material	EPDM
Warranty	1 year
